

the capital construction cost to the 2014 budget. He also proposed adding \$8,268 to the 2014 capital budget for a spare bar screen grinder and postponing the \$3,000 rehabilitation of the South Woodmoor metering vault until 2014.

There was JUC consensus on all of Burks' proposed

2014 budget changes. Burks said he would make these changes and distribute the final draft to each district by the end of the day.

Burks provided copies of the state contract for the two nutrient grants noted above to each of the districts to be signed by the three board presidents.

District managers' reports

Wicklund gave an update on Monument lift station repairs for the past month. Palmer Lake District Manager Becky Orcutt and Woodmoor District Manager Jessie Shaffer stated that they each had no issues to report.

Facility manager's report

Burks noted that the plant had operated very efficiently since the last JUC meeting, with all discharge monitoring report results being well below permit limits. The various

August nutrient readings for the plant's effluent and in-stream readings above and below the discharge pipe were consistent with those reported to the state under Control Regulation 85 over the past several months. He stated that he believed sludge removal from the sludge lagoon for use as agricultural fertilizer would be completed in a few more weeks.

The meeting was adjourned at 11:55 a.m.

The next meeting will be held at 10 a.m. on Nov. 12 at the at the Tri-Lakes facility's conference room, 16510 Mitchell Ave. Meetings are normally held on the second Tuesday of the month. Information for these meetings is available at 481-4053.

Woodmoor Water and Sanitation District, Oct. 10

District repairs leaks

By Candice Hitt

At the Oct. 10 Woodmoor Water and Sanitation District board meeting, District Manager Jessie Shaffer reported that the district had repaired several leak problems over the last several months. The leaks began late last fall when the water report began showing inconsistencies between water produced and water consumed.

The district began a thorough investigation of the water system and treatment facilities. The repairs were performed by the district staff at minimal cost using supplies on hand, Shaffer said. The unaccounted water percentage is back to normal, at around 5 percent. Shaffer

stated that he will continue to monitor the water report to be certain the leak problems have been fixed and will be able to provide more information in a few months.

Operations report

Assistant Manager Randy Gillette gave the operations report, stating that this year the district has not had any taste and odor issues with its water, and it will hold off on the taste and odor pilot study. Gillette reported that due to Monument Creek flowing so well, the district didn't have to use as much lake water to keep up with the summer demands. The district has stopped taking water from Monument Creek and has switched back to Lake Woodmoor to test the difference in water quality between the two sources. Gillette will bring the results to the board when the testing has been completed.

Public relations

Shaffer stated that plans for a walking trail around Lake Woodmoor are on hold. Shaffer was waiting to hear about the Woodmoor Improvement Association's plans, and will report to the board when he has more information.

Shaffer presented the draft *Pipeline* newsletter to the board. The final version will be mailed to district customers next week.

The next regular board meeting will be held at 1 p.m. Thursday, Nov. 14, at the Woodmoor Water and Sanitation District Office, 1845 Woodmoor Dr., Monument. For information: 488-2525 or www.woodmoorwater.com.
